## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 1-15 are objected to because of the following informalities:
2. Claims 1-11 are objected to since in claim 1 second line from the bottom, “values” should probably be ‘value’ since before, “second signal noise measurement value” was recited.
3. Claims 12-15 are objected to since in claim 12, “..” should probably be ‘.’
4. Appropriate correction is required.

### ***Allowable Subject Matter***

5. Claims 1-15 are objected to as indicated above but would be allowable if rewritten.
6. The following is a statement of reasons for the indication of allowable subject matter:  
The art of record does not suggest the respective claim combinations together and nor would the respective claim combinations be obvious with:
  7. As per claims 1-11: changing said at least one line rate as a function of the result of said comparison of said second signal noise measurement value to said first rate adjustment threshold, when said second signal noise measurement value differs from said first rate adjustment threshold in a pre-selected manner, without performing a resynchronization operation.
  8. As per claims 12-15: means for requesting a change in line rate from said first modem in response to detecting a signal to noise condition which does not cause a loss in synchronization with said first modem but differs from a predetermined threshold in a preselected manner;  
means for generating a command to write a new line rate into said customer modem in response to a request for a new line rate received from said customer modem without interfering with an

established communications session between said first modem and said customer modem and without performing a resynchronization operation.

***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: USPN 7035249.

This application is in condition for allowance except for the following formal matters:

Claim objections above.
